

Postdoctoral Associate Position

National High Magnetic Field Laboratory
Florida State University, Tallahassee, FL USA

We anticipate funding for one or more postdoctoral associate positions at the National High Magnetic Field Laboratory for a scientist or engineer to work in the area of instrumentation and technique development for high resolution NMR. The position will be located at Florida State University in Tallahassee, FL USA and is expected to start in September, 2017 or thereafter. Depending on candidate interests and available funding, topics may include superconducting thin film rf detectors for solution NMR, and NMR at fields beyond the reach of conventional superconductors (>23 T). The successful candidate will have a background in either RF electrical engineering or experimental high resolution NMR. Applicants who enjoy working at the interface of science and engineering are encouraged to apply. Additional information about the program can be found at <http://nmr.magnet.fsu.edu>. Candidates should send their curriculum vitae, a description of their research experience and goals, and the names and contact information of three references to Dr. William Brey at wbrey@magnet.fsu.edu. Applications will be evaluated as they are received. Florida State University is an Equal Opportunity/Access/Affirmative Action Employer.

At the ENC, please stop by poster 419 and meet with Dr. Ilya Litvak.
